

## DREAMBENT STUDIOS TATTOO

1. After **30 to 45 minutes**, **remove the bandage** and **wash** your tattoo with **warm water** and **antibacterial soap** for 2-3 minutes to remove any impurities from the skin. **Pat dry** with a **clean towel** or **soft paper towel**. **Do Not rub** the surface area of the freshly tattooed **skin**.
2. **After washing** your tattoo, apply a **light coat** of **regular unscented lotion**. Recommended brands: Rx Aftercare, Lubriderm, Curel, or Udderly Smooth. **Avoid scented** lotions.
3. For the following **3 to 4 weeks**, **Wash and Moisturize** your tattoo **2-3 times** a day. **Do Not re-bandage** your tattoo under any circumstance. **Wash your hands** thoroughly before making contact with your tattoo.
4. During the healing process, your tattoo will begin to **Peel** and in some cases even **Scab**. **Skin flakes** will begin to shed **pigment particles** and the **surface** of the **skin** will appear **shiny** giving the tattoo an almost faded look.
5. **For the following 2 Weeks:**  
**DO NOT** expose your tattoo to direct sunlight, tanning, saunas, sunscreen, pets or people touching your tattoo.  
**DO NOT** neglect the aftercare procedures and instructions.  
**DO NOT** submerge your tattoo in ocean water, hot tubs, swimming pools or baths as this may put you at risk of infection.  
**DO NOT** scratch or pick at your new tattoo as this may damage and prolong the healing process.  
**DO NOT** re-bandage, apply gauze or wear tight abrasive articles of clothing that may irritate your fresh tattoo.
6. If you suspect you have an **Infection** or an **Allergic Reaction**, please **contact us** and/or a **health care provider** immediately.

These care instructions are a major part of the healing process.

The tattoo is now yours, with great care comes great healing.
